

WHAT IS CLAIMED IS:

1. A method, comprising:
generating a recipient list;
selecting one or more data mark information; and
transmitting said one or more data mark information to one or more recipients in said recipient list.
2. The method of claim 1 wherein said recipient list includes one or more of a name of a recipient and an email address corresponding to each of said one or more names.
3. The method of claim 1 wherein the selecting step includes performing a drag and drop operation.
4. The method of claim 3 wherein said drag and drop operation includes:
selecting an icon representing said one or more data mark information;
dragging said selected icon over an application display; and
deselecting said dragged icon substantially over said application display.
5. The method of claim 4 wherein said icon includes a combined graphical and text display representation.
6. The method of claim 4 wherein said application display includes an electronic mail application display.
7. The method of claim 4 wherein transmitting step includes initiating an application function corresponding to said application display for transmitting said one or more data mark information.
8. The method of claim 1 further including storing said recipient list.

9. The method of claim 1 further including modifying said recipient list.

10. The method of claim 1 further including appending a message text to said one or more data mark information transmission.

11. The method of claim 1 wherein said data mark information includes a playlist information corresponding to one or more bookmarked music clip broadcasts.

12. The method of claim 1 wherein said transmitting step includes generating an electronic mail including said data mark information and transmitting said generated electronic mail to said one or more recipients.

13. A method, comprising:
displaying a recipient list window;
receiving one or more input signals corresponding to one or more entry in said recipient list;
displaying data mark information;
displaying an application function icon;
detecting a selection of the displayed data mark information and said application function icon; and
transmitting an electronic message including said data mark information.

14. The method of claim 13 wherein said recipient list window includes one of a pop-up window display and a drop down window display.

15. The method of claim 13 wherein said one or more input signals includes one or more of a name and electronic mail address pair.

16. The method of claim 13 wherein said data mark information includes a playlist information corresponding to one or more bookmarked broadcast music

clips.

17. The method of claim 13 wherein said displaying data mark information step includes generating a combined graphical and text representation
5 corresponding to said data mark information.

18. The method of claim 13 wherein said message transmitting step includes automatically transmitting said message after said detecting step.

10 19. The method of claim 13 wherein said message transmitting step includes:

displaying a message window;
detecting a transmit command; and
transmitting said electronic message.

15 20. The method of claim 19 wherein said data mark information in said transmitted message includes one or more playlist information each corresponding to a bookmarked music clip broadcast.

20 21. The method of claim 13 further including storing said recipient list.

22. The method of claim 13 wherein said detecting step includes detecting a drag and drop operation of said data mark information.

25 23. A method, comprising:
initiating a mail application function;
transmitting recipient information; and
inputting a command for transmitting an electronic mail message
including one or more data mark information.

30 24. The method of claim 23 wherein said one or more data mark

information includes one or more playlist information each corresponding to a bookmarked broadcast music clip.

25. The method of claim 23 further including initiating an auto transmit function.

26. The method of claim 25 further including appending a default message to said electronic mail message.

27. The method of claim 23 wherein said recipient information transmitting step includes revising a recipient list.

28. The method of claim 27 wherein said recipient list includes one or more of a name and an electronic mail address pairs.

29. A data mark sharing system, comprising:
means for generating a recipient list;
means for selecting one or more data mark information; and
means for transmitting said one or more data mark information to one or more recipients in said recipient list.

30. The system of claim 30 wherein said recipient list includes one or more of a name of a recipient and an email address corresponding to each of said one or more names.

31. The system of claim 29 wherein the selecting means includes means for performing a drag and drop operation.

32. The system of claim 31 wherein said means for performing said drag and drop operation includes:
means for selecting an icon representing said one or more data mark

information;

means for dragging said selected icon over an application display; and

means for deselecting said dragged icon substantially over said
application display.

5

33. The system of claim 32 wherein said icon includes a combined graphical
and text display representation.

34. The system of claim 32 wherein said application display includes an
electronic mail application display.

10

35. The system of claim 32 wherein transmitting means includes means for
initiating an application function corresponding to said application display for
transmitting said one or more data mark information.

15

36. The system of claim 29 further including means for storing said
recipient list.

37. The system of claim 29 further including means for modifying said
recipient list.

20

38. The system of claim 29 further including means for appending a
message text to said one or more data mark information transmission.

25

39. The system of claim 29 wherein said data mark information includes a
playlist information corresponding to one or more bookmarked music clip
broadcasts.

30

40. The system of claim 29 wherein said transmitting means includes means
for generating an electronic mail including said data mark information and
transmitting said generated electronic mail to said one or more recipients.

41. A data mark information electronic mailing system, comprising:
means for displaying a recipient list window, data mark information and
an application function icon;

5 means for receiving one or more input signals corresponding to one or
more entry in said recipient list;

means for detecting a selection of the displayed data mark information
and said application function icon; and

10 means for transmitting an electronic message including said data mark
information.

42. The system of claim 41 wherein said recipient list window includes one
of a pop-up window display and a drop down window display.

15 43. A data mark information sharing system, comprising:
means for initiating an electronic mail application function;
means for transmitting recipient information; and
means for inputting a command for transmitting an electronic mail
20 message including one or more data mark information.

44. The system of claim 43 wherein said one or more data mark information
includes one or more playlist information each corresponding to a bookmarked
broadcast music clip.
